

All is one:

"Oneness" is a spiritual concept central to many religions. One way of observing "oneness" is by the air that connects all living life on earth. We all breathe the same air, and the energy that is in it binds us. We are all one and this oneness is in all of us.

All experiences can be found within each one of us and each one of us can be found in all experiences. From this perspective, "Oneness" binds all life on earth and promotes an understanding of reality without preconditioned filters and interpretations.

The choral contrasts thick textures with light density, using aleatoric figures extended vocal techniques and noise in attempt to create a shimmering and rich sound landscape.

This piece is dedicated to all people who are driven to darkness and sorrow by war and fighting.
